CITY OF BAINBRIDGE ISLAND RECEIVES OUTSTANDING WASTEWATER TREATMENT PLANT AWARD

Bainbridge Island, Wash., (November, 2017) – For the third consecutive year, the Department of Ecology Northwest Regional Office has recognized the City of Bainbridge Island for the exceptional performance of wastewater treatment at the Bainbridge Island Wastewater Treatment Plant.

The Wastewater Treatment Plant Award recognizes that the team of dedicated City staff has maintained compliance with effluent limits, monitoring and reporting requirements and overall operational demands of the National Pollutant Discharge Elimination System permit during 2016.

“The City’s Wastewater Treatment Plant team works 365 days a year to protect water quality on Bainbridge Island and in the Puget Sound,” said City Manager Doug Schulze. “We are proud of the work being done at the treatment plant, and we are committed to continued excellence.”

For more information can be found on the [Department of Ecology’s Wastewater Treatment Plant Award site](#).
